

GREEN Giveback

An ENCO Rewards Program

Commitment

Since its inception, Enco Industries has put the health of our environment at the core of its values, exuding a strong desire to make the world a greener place. By committing to our **One Million Tree Pledge Campaign**, Enco will add to reforestation projects throughout the nation.

Responsibility

While carbon emissions are inevitable yet harmful, as participants in business activities we have the responsibility to minimize and offset these emissions. Currently, 2 million acres of national forests are in desperate need of our help, due to massive losses caused by global climate change, forest fires, and the effects of modern civilization. By partnering with the National Forest Foundation to plant trees, we re-introduce our natural carbon filters to the earth. Enco's Rewards & Green Giveback is simply Good for You & Good for the Environment.

Sustainability

Enco maintains Corporate Social Responsibility by focusing on sustainability. It's important to conduct business in a manner that doesn't harm the ecosystem beyond repair, but sustains it, allowing it to flourish.

We enforce this matter with our Environmentally Preferred products, Giveback Program and **One Million Tree Pledge Campaign** designed to prevent soil erosion, restore natural habitats, and absorb carbon dioxide to reduce global warming. For every purchase you make, Enco Industries will donate seedlings to the National Forest Foundation and give you money back on future orders.

Join us and support the **One Million Tree Pledge Campaign**.
