

**For Immediate Release**

## **ENCO Industries Announces Green Giveback and Rewards Points on all Purchases; Good for You Good for the Environment**

**Plaistow, NH** – ENCO Industries proudly announces the launch of their Rewards and Green Giveback Program allowing all members to receive points per purchase. ENCO is a firm believer in protecting the ecosystem and has implemented this program to help combat the decay of the environment while providing their customers with a monetary incentive. Any company can join by simply signing up at [EncoRewardsProgram.com](http://EncoRewardsProgram.com).

ENCO Rewards is a free of charge program that is designed to grant buyers points in correspondence to an actual dollar value. These may be redeemed on any chosen purchase(s) for the following year.

In accordance with this, ENCO donates a percentage of all purchases to the Arbor Day and National Forest Foundations. These donations are used to aid in reforestation as well as educating individuals on the importance of caring for the environment.

ENCO is dedicated to reducing their carbon footprint, which is a measurement of any carbon emissions produced through daily activities, and is willing to help other industries do the same through Green Giveback.

The benefits of partnering with ENCO Rewards are three-fold: providing a growing discount on future orders, and helping to clean up carbon footprints, while simultaneously improving the sustainability of the earth.

**About Enco Industries:** ENCO Industries specializes in providing integrated solutions for environmental, industrial, and government sectors. ENCO has recently been awarded a GSA Schedule, confirming their excellence and ability to comply with government standards while shipping superior products at a competitive price.
